Job Title: FIPS Documentation Specialist
Schedule: FT
Travel Required: No
Location: Fully remote
Competitive pay, great benefits, and unlimited PTO

Job description:

Join our growing FIPS team! SafeLogic is a fully remote software company that focuses on providing fast, comprehensive, and fully supported FIPS solutions for a wide range of customers. Your role will include working with our developers to create compliance documentation for our new modules, creating and assembling submissions for our FIPS testing labs, and helping our other teams and customers understand the FIPS process. You don't need to be an expert in FIPS yet – we'll help you get there.

Preferred candidate will have/be:

- Strong written and verbal communication skills
- A year or more of experience with FIPS 140 validation requirements
- Familiar with common cryptographic algorithms and security protocols
- Experience with technical writing and proofreading
- Independent and proactive, with strong time management skills
- Attentive to details
- Skilled at implementing and maintaining organizational systems
- Curious and eager to learn

Bonus skills:

- Experience working with software engineers to document how code level, design level, and organization level solutions meet a set of requirements
- Comfortable explaining FIPS to other internal teams and our customers
- Familiarity with open-source cryptographic libraries
- Familiarity with C, java, or other common programming languages
- A love of research and navigating labyrinthine standards and processes

Not sure if you're qualified? Please reach out to chat with us and see if this is a good fit! We're a proud equal opportunity employer, and as a growing startup our employees have the opportunity to shape their roles to reflect their unique strengths and interests.

Please include a resume and cover letter in your application. Send them to careers@safelogic.com.
